GENERAL INFORMATION

SYNURGIZE will enhance the herbicide activity of certain post-emergence herbicides when used at the proper rate. **SYNURGIZE** is a proprietary blend of high-quality, nonionic surfactants (phosphate ester of polyglycols) and ammonium salts. When used at recommended rates, **SYNURGIZE** can increase the performance of those herbicides recommended for use with ammonium-based nitrogen. The added herbicide performance produced by the use of **SYNERGIZE** may be more apparent in situations of environmental stress.

DIRECTIONS FOR USE

Add **SYNURGIZE** to the spray tank at the rate specified by the herbicide label and follow directions for use as to rates, timing, procedures, and crop restrictions. Check compatibility of proposed spray mixture in a jar test before large scale mixing. It is recommended that a test area be used when conditions of high humidity or high temperature exist.

Recommended Rate: 1-2 qt (32-64 oz) per 100 gallons water

MIXING INSTRUCTIONS

Add half the amount of water to the spray tank and begin agitation. Add the required amount of **SYNURGIZE** and herbicides to the spray tank. Add the remainder with water. Continue agitation until all **SYNURGIZE** has been applied.

STORAGE AND DISPOSAL

Store in cool, dry place in original container. Keep container tightly closed. Do not reuse empty container. Triple rinse then offer for recycling or for disposal in a sanitary landfill, or by other means in accordance with local, state, and federal regulations.
