

XR⁵ SULFUR

WHAT IS XR⁵™ SULFUR

XR⁵™ Sulfur is a foliar sulfur coupled with technology designed to complement nutrient demand and increase yield potential. XR⁵ Sulfur is an excellent source of foliar sulfur that can be tank mixed with post applications across multiple crops.

HOW DOES XR⁵™ SULFUR WORK

- NTake™ maximizes nutrient mobility to critical plant systems
- Highly efficient source of necessary sulfur for plants during peak demand stage
- Essential for chlorophyll production
- Efficient source of sulfur to meet plant needs during times of peak demand

APPLICATION RATES

FOLIAR

1 to 2 qt or 1-2 L per acre or 2.4 to 4.8 L per hectare
