

**SHAKE WELL BEFORE USE  
DO NOT FREEZE**

**BINDE**  
**NXT**

## PRINCIPAL FUNCTIONING AGENTS

Paraffin Based Petroleum Oil .....	55.8%
Poly Fatty Acid Esters and Polyethoxylated Derivatives .....	4.2%
Hydrogenated Hydrocarbon Resin .....	40.0%
<b>Total .....</b>	<b>100.0%</b>

### GENERAL INFORMATION

**Binde NXT** is an extender sticker-spreader designed to extend the life of pesticides. It may be used with all pesticides and soluble fertilizers. **Binde NXT** forms a durable film that holds a pesticide on the crop foliage. This shield greatly reduces the effects of environmental factors, which may decrease the effectiveness of pesticides.

**Binde NXT** will not foam, freeze, or clog nozzles. It may be applied by air, ground, or concentrate sprayer. It enhances the initial pesticide application to give complete coverage. **Binde NXT** prevents the removal of the pesticides from the leaf surface by rainfall and wind. It screens the pesticide spray residue from ultraviolet rays which often cause pesticide degradation. Pesticide volatilization is minimized by the protective shield. Under most conditions, apply sprays containing **Binde NXT** and allow at least one hour of daylight before anticipated rain. Sunlight for this time period is required for the protective shield to set.

### DIRECTIONS FOR USE

To extend the activity and increase the efficiency of insecticidal and fungicidal sprays, use 1 pint (16 fl oz) per acre with apply by aircraft or by ground equipment. For hydraulic gun or air blast tree sprayer used for spray application to shade, fruit, and nut trees, apply 6 to 8 fl oz of **Binde NXT** per 100 gallons of water when applied dilute. For dilute application of citrus sprays, where the spray volume is 1,000 to 1,500 gallons per acre, use 2 pints (32 fl oz) of **Binde NXT** per 500 gallons of spray mix. For concentrate sprays, where the total spray volume is approximately 100 gallons or less per acre, use 1 pint (16 fl oz) of **Binde NXT** per acre. For turf applications use at the rate of 8 to 16 fl oz per acre. For use in vegetable and cotton programs, use at the rate of 4 to 16 fl oz per acre. **Binde NXT** use at the rate of 4 fl oz per acre enhances the sticking activity of insecticides and fungicides. **Binde NXT** used at the rate of 8 fl oz per acre provides some extension of most insecticides and fungicides.

Use in spray tank combination with insecticides and fungicides. Do not apply **Binde NXT** to food crops within 30 days of harvest except as follows: **Binde NXT** can be used with copper fungicides, *Bacillus thuringiensis* products, and other tolerance exempt pesticides on food crops up to harvest.

### CAUTION

Use of **Binde NXT** with tolerance exempt pesticides close to harvest may result in visible residues on crops, which may render the crops unsalable. If

this is a potential problem, the **Binde NXT** rate should be reduced or **Binde NXT** should not be used close to harvest. Do not apply to food crops within 30 days of harvest when *Bacillus thuringiensis* products are combined in the spray tank with other insecticides.

### MIXING DIRECTIONS

To ensure good emulsification, pre-mix **Binde NXT** with water before adding to spray tank. Add **Binde NXT** to the spray tank as the last ingredient, as the spray tank is filling, with the agitator running. Always rinse tank, lines, and nozzles with water immediately after spraying. After rinsing, a small amount of sticky residue may remain in the spray tank. This residue can help prevent rust and corrosion and will not clog nozzles when sprayer is next used. If spray drift accidentally lands on undesired surfaces, it can be removed with soap and water before the spray residue is dry or with premium grade kerosene after the film has dried. To remove dried deposits from painted car surfaces, use standard tar remover products designed for use on painted car finishes.

### STORAGE AND DISPOSAL

Store in a cool, dry place in original container. DO NOT FREEZE. Keep container tightly closed. Do not reuse empty container. Triple rinse then offer for recycling or for disposal in a sanitary landfill, or by other means in accordance with local, state, and federal regulations.

### PHYSICAL OR CHEMICAL HAZARDS

Do not use, pour, spill, or store near heat or open flame. Use adequate ventilation when handling.

### PRECAUTIONARY STATEMENTS

Keep container tightly closed. Avoid contact with eyes, skin, and breathing vapors or spray mist. Wear protective gloves. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Use adequate ventilation when handling. Keep away from open flame. In case of fire: Dry chemical fire extinguisher to extinguish and call CHEMTREC (800) 424-9300.

### FIRST AID

If exposed call CHEMTREC or refer to SDS First Aid section. If on skin: Take off contaminated clothes immediately. Rinse skin with water.

### NOTICE

Manufacturer warrants that **Binde NXT** conforms to its chemical description and will perform as stated on the label when used according to directions and under normal conditions. Neither this warranty nor any other warrant of merchantability, expressed or implied, extends to the use of this product contrary to label directions. Buyer assumes all risk if **Binde NXT** is used in any manner or under any condition other than those specifically set forth on the label.
