

SURSIL™

PRINCIPLE FUNCTIONING AGENTS

Polyalkyleneoxide Modified Heptamethyltrisiloxane
and nonionic surfactants100.0%
Constitutes ineffective as adjuvant0.0%

WARNING
KEEP OUT OF REACH
OF CHILDREN

GENERAL INFORMATION

SURSIL is a superior nonionic agent designed for water based herbicide application. It is designed for fast spreading uniform distribution and absorption of spray on leaf and stem surfaces. **SURSIL** may be used with most pesticides and fertilizer products. (See cautionary statements under directions for use.) Optimum application and consequent effects can be influenced by many factors. It is recommended that the spray layer be observed and adjuvant rates be adjusted accordingly. During application, insure thorough coverage without excessive run off.

DIRECTIONS FOR USE

SURSIL when applied with pesticides and fertilizers and micronutrients will be effective on alfalfa, corn, oats, peanuts, rice, sorghum, soybeans, sugarcane, wheat, lawns, turf, greens and tees, and deep feeding trees.

For optimum results:

Ground: Use 12 ounces to 64 ounces per 100 gallons of spray

Aerial: Use 12 ounces to 32 ounces per 100 gallons of spray

General Wetter/Sprayer: Use 6 ounces to 12 ounces per 100 gallons of spray.

Note: When applying aerially, follow pesticide label directions including minimum water per volume per acre. Do not substitute **SURSIL** for water required by the pesticide label.

SURSIL is also recommended for use with non-selective herbicides and other pesticides including those used to desiccate or defoliate. The rate guidelines are for use with pesticides whose labels recommend the use of a nonionic surfactant. For best efficiency, increased or decreased surfactant rates may be required for some pesticides. Follow directions on the pesticide label when this occurs. Applications of **SURSIL** through irrigation injection systems are possible provided that the recommended use rates and dilutions are maintained and local, state, and federal guidelines are followed. Before adding **SURSIL** to spray tank mixes or before using with a pesticide or fertilizer where a nonionic adjuvant is not specifically recommended but not prohibited by the

manufacturer, the user or application advisor must have experience with the combination or must have conducted a phytotoxicity trial of their own. For most efficient water penetration of hard to wet soils and the even distribution of applied moisture follow recommended uses:

Lawns & Turf	.05% - .125% v/v concentration
Greens & Tees	.05% - .125% v/v concentration
Deep Feeding Trees	.10% - .20% v/v concentration

STORAGE AND DISPOSAL

Store in cool, dry place. Store in original container. Keep container tightly closed. Do not reuse empty container. Triple rinse, then offer for recycling or for disposal in a sanitary landfill, or by other means in accordance with local, state and federal regulations.

PRECAUTIONARY STATEMENTS

Keep container tightly closed. Avoid contact with eyes, skin and breathing vapors or spray mist. Wear protective gloves. Do not eat, drink or smoke when using this product. Wash hands thoroughly after handling. Use adequate ventilation when handling. Keep away from open flame. In case of fire: Dry chemical fire extinguisher to extinguish and call CHEMTREC (800) 424-9300. First Aid: If exposed call CHEMTREC or refer to SDS First Aid section. If on skin: Take off contaminated clothes immediately. Rinse skin with water..

NOTICE

Manufacturer warrants that SURSIL conforms to its chemical description and will perform as stated on the label when used according to directions and under normal conditions. Neither this warranty or any other warranty of merchantability, expressed or implied, extends to the use of this product contrary to label directions. Buyer assumes all risk if SURSIL is used in any manner or under any condition other than those specifically set forth on the label.
